

Measurement app

# Measure directly on the microscope

No more rulers. Measure length, diameter, angle and more directly on the microscope. Great for verifying component sizes and placement.

“With onscreen measurements, we can **confirm** the placement and spacing of components. It's great

**TAGARNO**

## Results

# Reduce customer returns

To reduce customer returns, measure the size and placement of key components. Share a photo of your work with customers ahead of delivery to confirm that everything is as specified.

## How to

# Measure, save and share

## Measure

Use tool menu to choose your preferred measurement

Choose between length, polyline, area, diameter, angle and more

Add text boxes and arrows to highlight an area of the inspection photo

## Save and share

Save an image of your inspection with or without the measurements you've made

Send the photo to colleagues or supply chain partners
