

CL53x

SYSTRONIC®

Multi chamber – multiple process cleaner

- **Cleaning, rinsing, drying of stencils, squeegees, misprints and pcb**
- **Completely built in stainless steel**
- **Lowest possible consumption**
- **High throughput due to the optimized workflow and parallel process**
- **Efficient drying in separate chamber**
- **Combination of different processes possible (SIA, SUI, US)**
- **Modularly expandable**

Capacity:	3 Stencils / frames
Throughput :	220 cycles / day
Chemistry:	pH-neutral or alkaline / DI-water
Application:	Stencil cleaning/ squeegee cleaning / misprints PCB cleaning
Outside dimensions:	3250x1980x2300mm
Usable chamber size:	800x800x40mm
Tank size:	3x 75Liter
Process time:	about 16min.
