

► **TECNOLAB**

Grab the Future

From screen printers to electronic distribution.

Tecnolab is undoubtedly the emblematic example of a company that has ridden the economic recovery, placing itself today in a predominant position in the electronic production and distribution industry in Italy

a cura di **Gaia Riboldi (Tecnolab)**

Tecnolab is a company located in Meda in the heart of Brianza, for over twenty years set its core business in the laser cut production (stencils and frames), positioning itself as number one in the Italian market.

A market whose time to reaction and time to production are minimised. That's why technical and laser department are constantly in expansion with ever-new projects such as the internalization of some outsourcing processes, in order to further reduce waiting times, grant quality standard and keep up

with customers' needs. The other part of TecnoLab core business is focused on consumables and locally produced equipments, such as Tecnogrid dynamic support, workbenches, stencils and frames cabinets.

2013: from Stencils to Distribution

Beginning of 2013, TecnoLab faced a new challenge: to enter the SMT's machine distributor market.

In a few years TecnoLab has grown

fast to become one of the distributions leader on the market and confirmed this business to be an important part of its turnover.

Prestigious brands portfolio such as EKRA, KOH YOUNG, Yxlon, UNIVERSAL and SMT reflow made it happen.

Adaptability, timeliness and technical preparation the main strengths that have enabled this short time growth.

Our partners Simpex Technology with their experienced technical team have been able to strengthen customers relationship and trust.

2016: a Brand New HQ

Since 2016, the new Headquarters' flagship is represented by a 200 m² Demo Room that hosts pick & place, screen printing machines, 3D SPI & AOI, X-ray machines, rework and cleaning systems.

The area is at customer's service and needs, here they can test our equipments, look at new features and get customized training.

Tecnolab is looking forward to meet their customers and "Grab the Future" at productronica 2017, where we will exhibit with our booth: **Hall A2 - Stand 459**.

Professional skills, availability and warm welcome during the show, and happy hours at the end of the day, will make you feel at home!

See you soon!!
Tecnolab Team
